Graph Semantics Legend

How to read the nucleus as an ERD+Bloom hybrid

- Node:**

typed entity with kind + label + tags + props (JSON)
- Edge:**

typed relationship with optional props (JSON)
- kind:**

the node's semantic class (authority, fact, motion, violation, etc.)
- label/name:**

human display strings; name often unique-ish; label is category header
- props:**

structured details (pinpoints, status, dates, citations, hashes, etc.)
- Spokes:**

hub-and-spoke nodes (e.g., authority_hub) for navigation and grouping
- Crosswalk:**

edges used to reconcile duplicate vocabularies (RELATES_TO / crosswalk)
- Contradiction Map:**

contradicts edges • OPEN/PARTIAL/SATISFIED status gates

Contradiction Map (CONTRADICTION_MAP.csv)

Sample lines showing narrative/litigative-style content
Sample (first 8 non-empty rows from provided preview):

1. 4. One of the individuals identified himself or was referred to as "Henry", and he was acting under the direction or approval of the property manager and/or representatives of Shady Oaks Park.
2. 5. At no point was Plaintiff Andrew Pigors present during this incident; I knew he was out of town visiting family, including his son, at the time.
3. 6. I was specifically asked to keep an eye on Plaintiff's home while he was away and thus had firsthand visual knowledge of the unauthorized entry.
4. 7. I did not observe any uniformed law enforcement officers or property served writ of eviction at the scene during the lock drilling or removal of property.
5. 8. I believe this entry was done without lawful court authorization, and it was highly disturbing to observe.
6. 9. I am willing to appear in court or provide testimony, if needed.
7. FURTHER AFFIANT SAYETH NOT.
