

IT IS HEREBY ORDERED that the Plaintiff, Andrew Pigors, shall obtain a mental health assessment and provide it to the Court. He is to inform the assessor of ALL the information that was presented to the Court at the hearing, including the incident at the library, alleged following by the same individuals, eviction from his housing, his Mother's refusal to talk to him any further, and his lack of employment. To avoid excessive costs, the Plaintiff may obtain this assessment at Health West.

The Court notes that the Plaintiff did email a HW assessment to the Court's secretary on Friday, September 5, 2025, before this order was complete. However, the Plaintiff did not follow the Court's instructions. The assessment states the following:

- That he has stable housing, but he is temporarily staying with a friend because the trailer he owns is being remodeled.
- He reports no issues with employment.
- He reports no issues with others with the exception of his ex.
- He has support of friends and family.

None of the above statements are what he testified to in Court. He was evicted, and his trailer is not being remodeled. According to the Plaintiff, it was damaged, if not destroyed by the owners of the trailer park. His District Court case resulted in an eviction. He sued in Circuit Court and that case was dismissed. He plans to file a federal lawsuit. He is currently not working, and has had several jobs over the course of the litigation, some of which he was terminated from. He stated that he was going to be starting another job. He has issues with his mother, who he stated is not speaking to him. Further, he made concerning calls to the Defendant's family/friends and acknowledged that he again violated the PPO by contacting the Defendant.
